

## Skyways Aviation arranges MD83 placement

On behalf of A.P. Finance Ltd, Skyways Aviation has arranged the purchase of one MD83 aircraft from the AERCO portfolio through portfolio manager AerCap of the Netherlands. Serial number 49627 was delivered on Tuesday 14th July 2009 and the aircraft will be leased on to specialist wet-lease operator SkyWings Airlines of Greece. Skyways Aviation sourced the first aircraft acquired by SkyWings when it commenced operations in 2005, and the airline now operates a fleet of three MD80 aircraft on ACMI contracts primarily in Europe.

Skyways Aviation offers specialist consultancy, marketing and asset management services to the regional airline industry and spans all aircraft types in the regional aircraft market. The company was originally formed to manage the aircraft leasing and trading transactions within the Skyways AB group of companies, but has since built up an extensive third party client base. Skyways Aviation has arranged nearly 400 aircraft transactions across 50 countries. Although the company mainly specialises in the regional aircraft market, Skyways Aviation has now concluded 13 MD80 transactions.
