

## Skyworld Aviation places Fokker 50 on behalf of Air Iceland

Acting on behalf of Air Iceland, Skyworld Aviation is pleased to announce the placement of a Fokker 50 with Avia Express of Sweden. Serial number 20144 (TF-JMM) has been placed on a short term dry lease and will operate within the Avia Express passenger domestic operation. The aircraft was delivered on Friday 8th January and will remain on the Icelandic register.

Skyworld Aviation was exclusively appointed to market Fokker 50 aircraft by Air Iceland after having previously successfully placed two aircraft on behalf of the Icelandic operator. We look forward to continuing the strong relationship with the airline.

Skyworld Aviation offers specialist consultancy, marketing and asset management services to the regional airline industry and spans all aircraft types in the regional aircraft market. The company was originally formed to manage the aircraft leasing and trading transactions within the Skyways AB group of companies, but has since built up an extensive third party client base. Skyworld Aviation has arranged nearly 400 aircraft transactions across 50 countries which includes over 100 Fokker transactions.
