

## Skyworld Aviation places two more Saab 340s

Skyworld Aviation is pleased to announce the sale of two Saab 340A aircraft, serial numbers 091 and 117 to Direct Aero Services of Romania.

Serial number 117 was delivered to the Romanian airline on 8th March 2010, having previously been operated by Lagun Air of Spain. Skyworld Aviation was acting on behalf of a UK-based investment company in the sale of the aircraft to Direct Aero Services. The aircraft is now marked with the registration YR-DAC and is operating on regional passenger routes on behalf of Direct Aero's sister airline Blue Air of Romania.

Serial number 091 (YR-DAH) was delivered on 18th March 2010 directly from its previous owner and operator Avitrans of Sweden. This aircraft will operate alongside serial number 117 and two other Saab 340As which Skyworld placed with the airline in late 2009.

Skyworld Aviation is pleased to announce that these two latest Saab placements take the total number of Saab 340 transactions to 100 ! Skyworld Aviation offers specialist consultancy, marketing and asset management services to the regional airline industry and spans all aircraft types in the regional aircraft market. The company was originally formed to manage the aircraft leasing and trading transactions within the Skyways AB group of companies in Sweden, but has since built up an extensive client base of over 130 companies.
